

SESSION REPORT

Mission

Analyze the main features of the calendar app.

Charter

Interaction with the interface should be focused on the following features:

- schedule a meeting
- schedule a vacation time
- check availability for a room and person
- print the agenda for a room
- print the agenda for a person.

Start time: 9.00 AM **End Time:** 10.00 AM **Duration of the session:** 60 minutes

Testing notes

Scheduled a meeting

- Verified that scheduling a meeting with multiple people works.
- Verified that scheduling a meeting with invalid time frames does not allow continuation.
- Verified that using an unknown Employee and Room does not allow continuation.

Scheduled a vacation

- Verified that scheduling a vacation with valid input works.
- Verified that people with scheduled vacations are not available for meetings during the same time frame.
- Verified that scheduling a meeting with invalid dates does not allow continuation.

Checked room and person availability

- Verified that only rooms and people available for a specific time frame will be displayed.

Printed agenda for rooms and people

- Verified that the printed agenda for scheduled meetings in a day for each room and person respectively is valid.

Fault information

- Can not schedule any meeting on the 30th of November because no rooms are available on that day.
- The date 31st of December is invalid according to the program.
- Can not schedule meetings that start and end in the same hour.
- Can not print an agenda for a month of a room regardless of whether scheduled meetings exist under that month.
- Can not print an agenda for a month of a person regardless of whether scheduled meetings exist under that month.
- Can allow the scheduling of a vacation that conflicts with an already scheduled meeting.

Issues Information: No issue was found in the testing process.

Setup time: 0.28% of the total time **Test Design and Execution time:** 99.72% of the total time
